

TURNING 22 YEARS OF AGE

As a student approaches the age of 22, Crossroads works closely with the student, the family, the school district, and the identified adult service agency to start the process of securing proper adult placement. When potential placements have been identified, Crossroads supports the family in visiting these settings and having staff members from these settings come to observe the student at Crossroads. When placement is confirmed, Crossroads will individualize a student's programming in a way that emulates the environment of the new placement. This process helps to produce a smooth transition for both the student and family.
